Lambda 3&4

The Lambda is the new generation of Lomax vehicles, which have built their enviable reputation upon the dramatic success of the original Citroen 2CV based 223 & 224 models. Beneath the beautifully rounded body is a brand new, professionally designed chassis and mechanical lay out that capitalises on the celebrated strengths of their ever popular stable mates to widen the choice yet further.

Lomax Lambda 3

The Lomax range of vehicles are designed to be easily constructed by the average D.I.Y. enthusiast. No special tools are required and a complete vehicle can be road ready in approximately 150 hours. Build costs including a donor vehicle are often as low as £2500.00. For further information and colour brochures please write enclosing £1 to the West Midlands Head Office quoting Dept. RT1

The Range

**Lomax
223 & 224**

Lomax Motor Company Limited have been producing classic styled sports vehicles in component form for the last thirteen years, and the marque is known as a classic in its field.

In common with all the Lomax range, the 223 / 224 three and four wheeled models require components from one low cost and readily available donor car or from Lomax works. Low insurance (group 1) and low tax on the three wheeler add to the pleasure of ownership
